

****Task****: Create a console application that initializes an array of 5 integers, populates it with values, and prints each value to the console.

****Objective****: Get familiar with arrays and loops.

****Sample Code (C#)****:

```
```csharp
```

```
using System;
```

```
class Program {
```

```
 static void Main() {
```

```
 int[] numbers = {1, 2, 3, 4, 5};
```

```
 foreach (int number in numbers) {
```

```
 Console.WriteLine(number);
```

```
 }
```

```
 }
```

```
}
```

```
```
```
